ONE SWIPE DOES IT ALL: AUTHORIZE, RESTRICT, LIMIT

Protecting information is essential to your business. The Kyocera Card Authentication Solution is a quick and convenient security option for your multifunctional devices utilizing employee ID badges. With a simple swipe of a badge, users gain immediate access to their Kyocera MFP, authorizing them to use features specific to their job function. With the Card Authentication Solution installed, corporate network resources and information can be secured, preventing unauthorized access.

The Kyocera Card Authentication Solution also enables administrators to track usage for reporting or accounting purposes, therefore saving your organization unnecessary waste. By leveraging select Kyocera MFPs, your business is able to protect vital information without the need to invest in additional security cards and high-priced hardware. The Kyocera Card Authentication Solution is a cost-effective solution for any enterprise.

HOW IT WORKS:

The Card Authentication Solution includes administrative software from Kyocera and a card reader from RF IDeas, which quickly and easily connects into your Kyocera MFP's USB port. Once installed and configured, users simply swipe their badges at the card reader. They are quickly authenticated and logged onto the device, allowing instant access to the MFP and secure retrieval of printed documents. It's that simple!
CARD AUTHENTICATION SOLUTION

FEATURES
The Card Authentication Solution includes Kyocera software and a card reader by RF IDeas, all of the items necessary to connect to select Kyocera MFPs.

Easy Interface
The plug-n-play reader design is truly easy to integrate into select Kyocera MFPs. The pcProx or AIR ID Card Reader connects directly to the USB port for advanced security. Ethernet reader connectivity option available on select Kyocera MFPs.
